

Building a better community together

We centralize and make sense of data to understand our community's needs.

We **updated 9 measures on the data portal**, ensuring the most recent data was available to inform decisions.

We completed a request for proposal process and began work with a web developer to make our website and data portal more useful and accessible.

The new website launches April 2025!

We work with local organizations to plan and take impactful action.

We supported **funding applications totaling over \$24 million** in local investment.

We facilitated **strategic planning at three local organizations**.

We **evaluated the Welcoming Streets Initiative** which was instrumental to securing continued funding.

We champion collective action in response to shared needs.

We facilitated a **webinar to share information about supporting housing options** in Guelph and Wellington County.

Through facilitating the Community Resilience Coalition, we **revised the core training, launched training for coaches, and launched a social enterprise** to fund continued action.

We participated in at total of **8 decision-making tables and community collaboratives**, chairing or co-chairing 4 of them.
